NON-GMO DECLARATION

We certify that the batches of the variety listed below, which you will receive from us, are issued from varieties that have not been genetically modified.

The methods used in the development and maintenance steps of the varieties produced by MAS Seeds, are aimed at achieving high purity standards and minimizing the risk of presence of off types or unintentional presence of other plant material, including genetically modified material.

Seeds production and manufacturing steps has been carried out according to standardized operational procedure in compliance with internal risks control plan for unintentional presence of GMO and with accepted industry standards for seed production and seed purity.

A test of genetically modified seeds purity has been performed according to PCR(1) standard method, on a representative sample harvested in compliance with ISTA(2) rules.

CROP	VARIETY	BATCH NUMBER	OFFICIAL NUMBER	PCR TEST RESULT	ANALYSIS ID
Corn	524A	0000344445	F0424D344445	<LOD(3)	308198

Mireille LABORDE
Head of Supply Chain

- (1): PCR: Polymerase chain reaction
- (2): ISTA: International seed testing association
- (3): LOD: Limit of detection
